

FOR IMMEDIATE RELEASE – 02 December 2008

**Amarinth secures \$1M API 610 vertical sump pump order
at ADIPEC in Abu Dhabi**

Amarinth, a leading company specialising in the design, application and manufacture of pumps and associated equipment for the oil and gas industry, has secured a \$1M order from Galfar Engineering and Construction of Abu Dhabi for ten super duplex API 610 VS4 vertical sump pumps.

Whilst exhibiting at the 13th bi-annual Abu Dhabi International Petroleum Exhibition & Conference (ADIPEC) in November, Amarith finalised a \$1M order from Galfar Engineering and Construction for the design, manufacture, and commissioning of ten super duplex API 610 VS4 Vertical Sump pumps. A key factor in the award of this order to Amarith was its combination of price competitiveness, lead time and product quality match. Amarith will be supplying the pumps on a lead time of just 30 – 35 weeks.

The pumps are a key component in the project known as 'Closed Drains System Modifications' at the Bab Plant which is owned and operated by the Abu Dhabi Company for Onshore Oil Operations (ADCO) and for which Galfar has won the EPC contract.

The project will improve the operability and safety of the existing facilities which encompasses the provision of a closed drain system at RDS 1/2/3/4/5 comprising of a drain vessel in a concrete pit with duty stand-by pumps and piping.

– MORE –

The existing drains system utilise the drain headers with burn pits to burn the drained oil whenever the flow lines are depressurized for any reason. The gas outlet from the RDS test separators is routed to a cold vent stack via a knock out drum. The project will minimise the use of burn pits and prevent the unnecessary loss of crude oil during draining activities which will reduce both the financial and environmental impact of the process.

Oliver Brigginsshaw, Managing Director of Amarith, added: "We are delighted to have won this significant order which further underlines the strength of our expanding Middle East operations and our commitment to delivering bespoke API 610 pumps on the shortest lead time in the industry. ADIPEC proved a great success for Amarith, and being able to finalise this order at the conference was an added bonus that rounded off an excellent week."

API 610 VS4 Vertical Sump Pump

NOTES TO EDITORS:

Founded in 2002, Amarith has harnessed the skills, creativity and passion of people who have worked in the pump industry for many years. Amarith delivers world-leading expertise in the design, application and manufacture of centrifugal pumps and associated equipment to ISO, ANSI & API standards, primarily for the industrial, chemical & petrochemical markets. Their portfolio includes:

- **Pumps:** Horizontal and vertical API 610 pumps, chemical and industrial pumps, many of which are interchangeable with the Girdlestone pump ranges, eliminating the need for expensive modifications when replacements are required.
- **Pressure Vessels:** Protect System Plan 52 and 53A and 53B sealant systems with inbuilt condition monitoring for pumps and mixers that are suitable for Safe area up to Zone I.
- **Spares & Service:** High quality, fast lead-time re-engineered spare parts to improve performance and extend pump life, including many which are directly interchangeable with the Girdlestone pump ranges.
- **Packages & Modules:** Condensate Recovery Units manufactured for Spirax Sarco incorporating the innovative Ci-Nergy intelligent variable speed control system, plus bespoke packages & skids built to order.
- **Business Systems:** state-of-the-art e-commerce technologies that deliver 24/7 support enabling customers to select pumps and place orders on-line and then track every stage of manufacture through to delivery, any time, anywhere in the world.

The company operates globally from its base in Rendlesham Suffolk, United Kingdom and has a customer base of world-leading companies, including BP, Shell, ExxonMobil, GlaxoSmithKline, Pfizer, Spirax Sarco, Diageo, AMEC, Fluor and Halliburton.
