ALPHACAM

»EN 213

The production of a life-size figure of Christ in less than half the time taken by current methods has repaid the faith shown by Spanish machine tool company, Bermaq, in selecting Licom's AlphaCAM programming equipment. Machined from a laminated wooden block using a 20mm roughing tool, a 20mm bullnose cutter and 6mm finishing tool, the 1.9m high figure was produced in just 20 hours.

PROFIL

»EN 214

Land-Rover has specified more than 320 of Profil's clinch nuts and studs in the assembly of its latest generation T5 platform Discovery vehicles. The use of Profil's fastening technology has become Land-Rover's preferred method of providing male and female threads in sheet metal components and body panels, superseding weld and other standard thread fasteners.

AMARINTH

»EN 215

Amarinth, a specialist in the design and manufacture of pumps and associated equipment for use in the petrochemical and chemical markets, has announced an addition to its range of products with the acquisition of Protect System. The company specialises in high quality seal systems and has refined solutions ranging from a basic thermosyphen vessel to fully compliant Zone 1 vessels with inbuilt condition monitoring.

MB ENGINEERING SERVICES

»EN 216

The Clayton Walker Gasholder Division of MB Engineering Services has won a £505,000 contract to design, engineer and supply the seal for a Wiggins Type Dry Seal gas holder for a new plant operated by steel producer Bhushan at Rengali in Orissa, India. Clayton Walker fought off stiff competition from China to win the order, and did so with the company's Indian partner Micco, who will manufacture and build the gas holder.

SGB

»EN 217

SGB Powered Access has supplied five of its road/rail powered access platforms to specialist contractor WA Developments to enable it to carry out installation work in rail tunnels. The company is currently using the equipment in the mile-long, brick Abbotscliffe tunnel on the Folkestone and Dover railway line. The platforms allow operatives to work safely and with ease and comfort at any location in the 8m high tunnel.

WALDMANN LIGHTING

»EN 218

The SNL 319 has a large, square, high-quality lens giving a clear view of the working area and incorporates three powerful energy-saving fluorescent lamps arranged in a U-shape around the lens. With three lamps on the magnifier it illuminates the work from all angles with no shadows, and by switching to the two-lamp mode it is immediately thrown into contrast.

SPECIALISED TECHNOLOGY RESOURCES

»EN 219

A new addition to the EN 17 series of European Standards has been published: EN 71 - Part 9. The revision addresses hazards posed by certain organic chemical compounds found in toys. There is a need for specialist advice so that toy makers, distributors and retailers can ensure that their current and planned products keep pace with the new and forthcoming legislation.

FLUKE

»EN 220

Fluke is offering a free thermography application guide, which explains how thermography and thermal imagers can be used to locate and troubleshoot hotspots around commercial buildings and industrial complexes. The packs include information on inspecting bearings, motors, steam systems, electrical connections, unbalance and overloads. The guide can be requested via the Fluke website: www.fluke.co.uk.

BUSCH

»EN 221

Busch (UK) Ltd, the vacuum pump and blower manufacturer, has supplied efficiency improving equipment to a leading fish feed company. Three Busch RC1000B vacuum pumps have been supplied to Skretting of Invergordon in Ross-shire, part of the global company Nutreco, which produces fish feed pellets used in the aquaculture industry. Busch engineers liaised closely with Skretting to find the most efficient solution.

POWDERMATRIX

»EN 222

Outokumpu Holton, a supplier of continuous extrusion machinery, has benefited significantly from research conducted as part of the SPARK awards programme, run by the Powdermatrix Faraday Partnership. Thanks to this research the company has been able to establish that Conform, one of its processes for the continuous extrusion of non-ferrous metals can be used for the extrusion of titanium.

DIAMOND GROUND PRODUCTS

»EN 223

Diamond Ground Products have introduced the Piranha 3, the most affordable tungsten grinder on the market. It combines quality, affordability and portability in one product designed to increase the consistency of your welding. The Piranha 3 is ideal for the manual Tig industry. PAW, or any application where grinding of tungsten is needed. For more information contact Kevin Hart or Allen Kerr on 01480 439706.

CRYDOM

»EN 224

Crydom now has switches for high-temperature, high-pressure, or hazardous area use and continues to develop new products to meet customers' specific requirements. Crydom has recently developed further custom switches for small ink reservoirs in industrial inkjet printers, having supplied switches to printing machine manufacturers for more than 10 years. Other switches are used in a range of applications including vending machines, aircraft and dishwashers.
